## **SUTURING FOR HEALTH PROFESSIONALS**

### **One-day workshop - fully catered**

In advanced nursing practice, rural and remote practice and some GP clinics or family practices, nurses are required to perform simple, uncomplicated wound closures. Suturing for Health Professionals allows a nurse to master this skill in preparation for clinical practice.

Content includes:

- Skin adhesive options
- Simple lacerations
- Scar minimisation
- Wound healing

This program includes a CD ROM learning tool, face-to-face practice with small group tuition and a quality take home practice kit which allows you to hone your skills.

Workshop practice uses a pig trotter model. This information is provided for potential participants to be aware. There is a vegan / anti-animal exploitation option available.
