

DIABETES

The **ECT4Health Diabetes Refresher Seminar** is a one-day journey through the science and pathophysiology of the condition, its diagnosis, assessment and management of the types of diabetes. Strong links to cardiovascular disease and obesity makes this family of diseases an area that contemporary nurses need to be current in.

Content includes:

- Diabetes Pathophysiology – The Hormones
- Pre-Diabetes – Can we reverse it?
- Monitoring Devices & Injection Technique
- Diabetes Emergencies: Hypo, DKA, HHS
- Microvascular Complications/Monitoring and much more...

<i>FSPH Education Rooms</i>	<i>Time</i>
Thursday 4th February 2021	0800 – 1630hrs
