PRESENTED BY ROB TIMMINGS

TIME: 8:30AM – 4:30PM

Two-day seminar – fully catered

The ECT4Health cardiac nursing programs are designed for nurses and students in the health sciences (premed, medicine, nursing and paramedical) to develop contemporary knowledge and confidence in the assessment and management of patients experiencing acute cardiac events.

At the completion of this seminar you will have an understanding of basic cardiac rhythm, the assessment of a patient experiencing acute chest pain and management modalities of chest pain events.

Content includes:

- Cellular physiology of the cardiac cells
- Cardiac anatomy and physiology
- Rhythm interpretation and Heart Block
- Fundamental 12 lead ECG interpretation
- Hypertension and the drugs used to manage HTN
- Chest pain causes, risks and the cholesterol myth
- Chest pain assessment and management
